November Tea of the Month

Mango Magic

This full bodied black tea was grown between 5,000 and 7600 feet above sea level in Sri Lanka. It has classic 'Ceylon' floral bouquet and flavour notes making it the perfect base for a flavoured black tea. To it are added real chunks of dried mango, resulting in an infusion that is bright and coppery, teeming with fresh, piquant character of the fruit.

Mangoes have long been associated in the Eastern world with peace, tranquility and harmony. Legend has it that the Buddha himself often sought repose in a grove of mango trees. Certain parts of India considered mango trees a sacred symbol of love.

There were lots of oohs and aahhs as the smooth taste of Mango Magic was explored by our tea tasters at the October event. For those of you looking for something special in a black tea; Mango Magic will banish the clouds and bring a smile to your face on a chilly November day. Some tea is good for you from a nutrition perspective; Mango Magic is just plain good!
